Subject: Geneva Rock Products, North Grantsville Quarry, M/045/0077
RDCC Project No. 11214

Dear Mr. Baker:

The State of Utah, through the Public Lands Policy Coordination Office (PLPCO), has reviewed this project. Utah Code (Section 63J-4-601, *et. seq.*) designates PLPCO as the entity responsible to coordinate the review of technical and policy actions that may affect the physical resources of the state, and to facilitate the exchange of information on those actions among federal, state, and local government agencies. As part of this process, PLPCO makes use of the Resource Development Coordinating Committee (RDCC). The RDCC includes representatives from the state agencies that are generally involved or impacted by public lands management. The Division of Air Quality provides the comments on this proposal.

Division of Air Quality

The proposed project is in Tooele County, which is a PM-2.5 non-attainment area. A non-attainment area is an area that has not met the National Ambient Air Quality Standards (NAAQS). Because it is a non-attainment area, the proposed project is subject to R307-309: Fugitive Emissions and Fugitive Dust, of the Utah Air Quality Rules. R307-309 requires that owners or operators of a project involving the clearing or leveling of land or access haul roads that are one-quarter acre or greater in size submit a fugitive dust control plan to the Executive Secretary of the Air Quality Board for review. The fugitive dust control plan must be submitted to the Executive Secretary at the Utah Division of Air Quality at 150 N. 1950 West, Salt Lake City, Utah, 84116 for review prior to commencement of the project. A copy of the rules may be found at www.rules.utah.gov/publicat/code/r307/r307.htm.
